We need a letter that explains our concept on how the cities and towns can do a dual propose effort.

1. **Bring public safety awareness to its residents.**
 - They say we show up ON Scene and have no info to help.
 - It takes time for responders ascertain the patient's problem or situation.
2. **Help cities and towns raise money since the budgets are getting cut and Fire and Police departments need public safety equipment**
3. **We will state that for every FH device sold they will receive xx to xx% return.**
